National Infrastructure & Business News

IN India's Solar Power Capacity Reaches 168 GW

India's solar power capacity has reached around **168 GW as of August 2026**, showing rapid growth in renewable energy. Solar capacity has increased significantly over the past decade, supported by rooftop solar, large solar parks and domestic manufacturing of solar equipment.

NEWS FROM PRE- ENGINEERING/ ROOFING SECTOR

Steel Market Highlights:

1) PEB Capacity Expansion Continues

Major PEB companies are investing in new manufacturing facilities and expanding production capacity to meet growing demand from industrial and infrastructure projects. Kirby, for example, has started work on a **100,000 MT facility in Tamil Nadu**.

2) Gujarat Strengthens Its PEB Position

Interarch has inaugurated the first phase of its **Kheda, Gujarat facility**, adding **20,000 MT annual capacity**. The full facility is planned for 40,000 MT capacity.

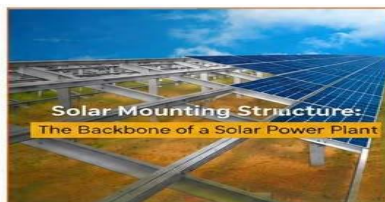

3) Data Centres Are Creating New PEB Demand

India's data-centre sector continues to expand,

EVENTS

AHEMDABAD GLOBAL SOLAR EXPO INDIA 2026

- Bansal Roofing Products Ltd. took part in the **Ahmedabad Global Solar Expo India 2026**, organised on **2–3 September 2026** at the **Helipad Exhibition Centre, Sector 17, Gandhinagar**. The company marked its presence at **Hall 1, Booth No. 63**.
- At the exhibition, Bansal Roofing Products Ltd. presented its expertise in **Solar Module Mounting Structures (MMS)** and solar steel solutions. The display highlighted **ground-mounted and rooftop structures, hot-dip galvanized components, customized mounting solutions, and fabricated steel structures** designed for different solar applications.
- The event provided an opportunity to

supported by AI and digital infrastructure. This is creating opportunities for **PEB structures, structural steel and specialised industrial buildings.**

4) Warehouses & Industrial Buildings Remain Key Growth Areas

Demand for **warehouses, logistics centres, manufacturing units and e-commerce facilities** remains strong, supporting continued use of PEB and structural-steel solutions.

PROJECT COMPLETION NEWS:-

Successful Completion of 110-Ton PEB Industrial Shed Project

Bansal Roofing Products Ltd. has successfully completed a **110-ton Pre-Engineered Building (PEB) project for Mr. Vijay Prajapati at Halol on 18 August 2026.** The project involved the construction of an **industrial shed**, incorporating **built-up sections, cold-formed sections, hot-rolled sections, roofing sheets, and cladding sheets.**

interact with **EPC companies, solar developers, industry professionals, consultants and business partners.** Through its participation, the company showcased its manufacturing capabilities, developed new industry connections and explored business opportunities in the **fast-growing renewable energy sector.**

Record Water Vapour Recorded in Earth's Atmosphere

Scientists reported that the atmosphere contained a **record amount of water vapour in August 2026.** Researchers say warmer global temperatures and the strong El Niño event contributed to the increase, which can influence extreme rainfall and heat.

Global Infrastructure Investment Focuses on Renewable Energy

Infrastructure investors are continuing to increase their focus on **renewable energy, solar power, battery storage and green hydrogen**. Recent projects include a new renewable-energy platform in Mexico combining solar generation with battery storage.

GLOBAL NEWS

18 September 2026

Global Infrastructure Investment Focuses on Renewable Energy

Infrastructure investors are continuing to increase their focus on renewable energy, solar power, battery storage and green hydrogen.

Recent Project: Mexico
A new renewable-energy platform in Mexico is combining solar generation with battery storage.

Solar Power
More investment in clean and affordable solar energy.

Battery Storage
Helps store clean energy for later use.

Green Hydrogen
Supports industries and clean transport in the future.

Renewable Energy
Builds a cleaner, stronger and more sustainable world.

More Clean Energy.
A Brighter Future.

Successful Completion of 65,000 kgs PEB Project

Bansal Roofing Products Ltd. has successfully completed a **Pre-Engineered Building (PEB) Warehouse Project at Samalaya, Vadodara**, with the project completed on 25 July 2026.

The project was successfully executed with a strong focus on **quality, engineering precision, safety, and timely completion**, delivering a reliable and durable warehouse solution. The successful completion of the

**World Meteorological Organization – August 2026
Climate Update)**

project reflects Bansal Roofing Products Ltd.'s commitment to providing **high-quality PEB solutions and satisfactory project execution** for its valued clients.
